# Multi-layer signal light integrated device warning light LED warning light reconfigurable tower lamp five-layer CT L0055

## Integrated signal light

Energy-efficient, beautiful and versatile design, suitable for all kinds of small and medium-sized equipment

- Ultra-high brightness LED specialization, significantly improving the color recognition of the signal light.
- The lampshade uses a hybrid cutting technology that eliminates visual blind spots and enhances long-range visibility.
- Built-in buzzer provides three pronunciations with a volume of up to 85 decibels
- Installation: direct mounting or pole mounting, and a variety of mounting brackets are available.
- The LED module color corresponds to the wiring color, and the LED module is added or removed or freely sorted without rewiring.
- There are five types of signals that can be emitted: red, yellow, green, blue, and white.
- Material: Shade-PC, Lamp body-ABS
- dustproof and waterproof design, protection class IP55, with buzzer IP23
